

## **SystemOne Contract Project Manager Roles in Tulsa and Wichita**

SystemOne in Tulsa is needing several experienced Project Managers working with creating and managing schedules, expediting work and overall contribution motivated. An engineering degree is not required. If interested, please contact [Doug.Halve@SystemOne.com](mailto:Doug.Halve@SystemOne.com) or 918-922-7130.

### **JOB DESCRIPTION**

#### **Responsibilities**

SystemOne in Tulsa, OK is seeking several Project Managers for a 6+ month contract to oversee projects in the Power/Process & Refining/Petrochem markets including oil and gas processing equipment, full steam solutions, burner systems, vapor control systems, flare systems, process burner systems, and thermal oxidizer systems

- Typical project scope will include water heaters, glycol dehydration units, boilers, burners, combustion stacks, vapor recovery systems, heat exchangers, separation products, fuel and valve skids with associated instrumentation and control panels
- You will work directly with our clients to ensure communication, project updates and resolution to any issues or project changes
- It will be critical that this Project Manager cultivates relationships within multi-discipline engineering teams, executives, stakeholders, and suppliers to track project milestones and key deliverables
- You will also be responsible for concurrent projects with accountability over designs, schedules, and budgets
- Effectively align and achieve customer expectations (including scope, schedule, quality, communication, documentation, project requirements, service, etc.)
- Create project plans based on customer needs
- Tracking and reporting with a scheduling tool and ensuring outward communication to teams, leadership, and external partners
- Anticipating and mitigating risks throughout project plans; communicate proactively with internal support teams and customers on project status and issues that arise
- Work with the engineering team to ensure specification compliance in the areas of design, system performance, and delivery criteria

#### **Qualifications**

At least 3 years of experience in Project Management working directly with external customers, vendors, and contractors

- At least 3 years of experience managing a broad base of project activities including design, procurement, project scheduling, controlling budgets, knowledge of fabrication, construction, and commissioning
- At least 3 years working on multiple concurrent projects
- Bachelor's degree in Engineering preferred but not required.
